

Social media feedback for the 2024 FoNS Residential Programme:

Facilitating the development of person-centred cultures

22-26 April 2024

A thought provoking week absorbed in the transformational process of active learning. I see: a positive change, I feel: a commitment to keep learning, I hear: excitement in the air, I think: I can do this #FoNSPCC2024

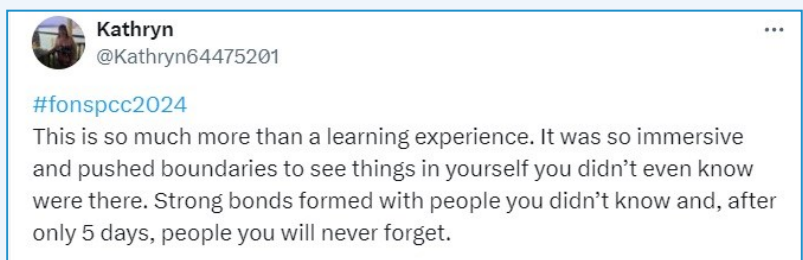

Very grateful to be a part of Residential Programme hosted by the Foundation of Nursing Studies. Meeting fellow PDNs, connecting, & learning from each other on how we can promote person-centred care in each of our areas of expertise

A wonderful opportunity to meet like-minded professionals who want to make a difference in the workplace. Inspiring conversations with so much learning and tools to take back too

Back from what has been the most phenomenal & transformative 5 days with such inspiring people @FoNScharity

I feel so grateful & thankful for this opportunity. Ready to take lots of learning back to my trust.

Another thought provoking day bringing challenge and reflection
